2. The application has been amended as follows:

In the claims:

claim 85, line 1, please delete "polymeric material" insert therefore --lens--;

claim 87, line 2, please delete "1.5" and insert therefore --2.6--.

3. The following is an examiner's statement of reasons for allowance:

The presently claimed oxygen and water/ion permeable lens comprises at least one oxygen permeable pathway which consists physically of a continuum of oxygen permeable material that extends from the inner to the outer surface of the lens. The lens also comprises at least one continuum extending from the inner surface of the lens to the outer surface of the lens, which continuum comprises an ion or water permeable material. This continuously permeable structure is included within a two-phase lens comprising a single piece. No prior art references, either taken alone or in combination, suggest a water or aqueous ion permeable lens having as well an oxygen permeability from the inner surface of the lens to the outer surface of the lens.
